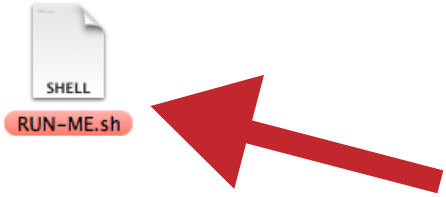
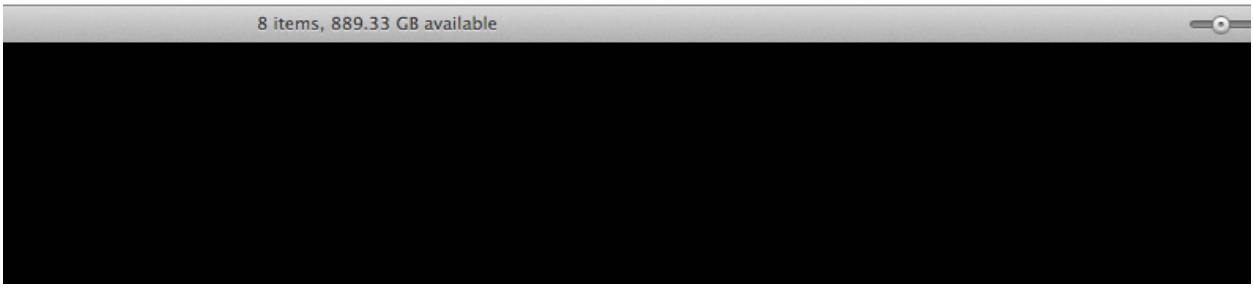
# Instructions on How to Start *North Channel*

North Channel should be restarted about once a day, just to make sure it's running reliably. Here's how.

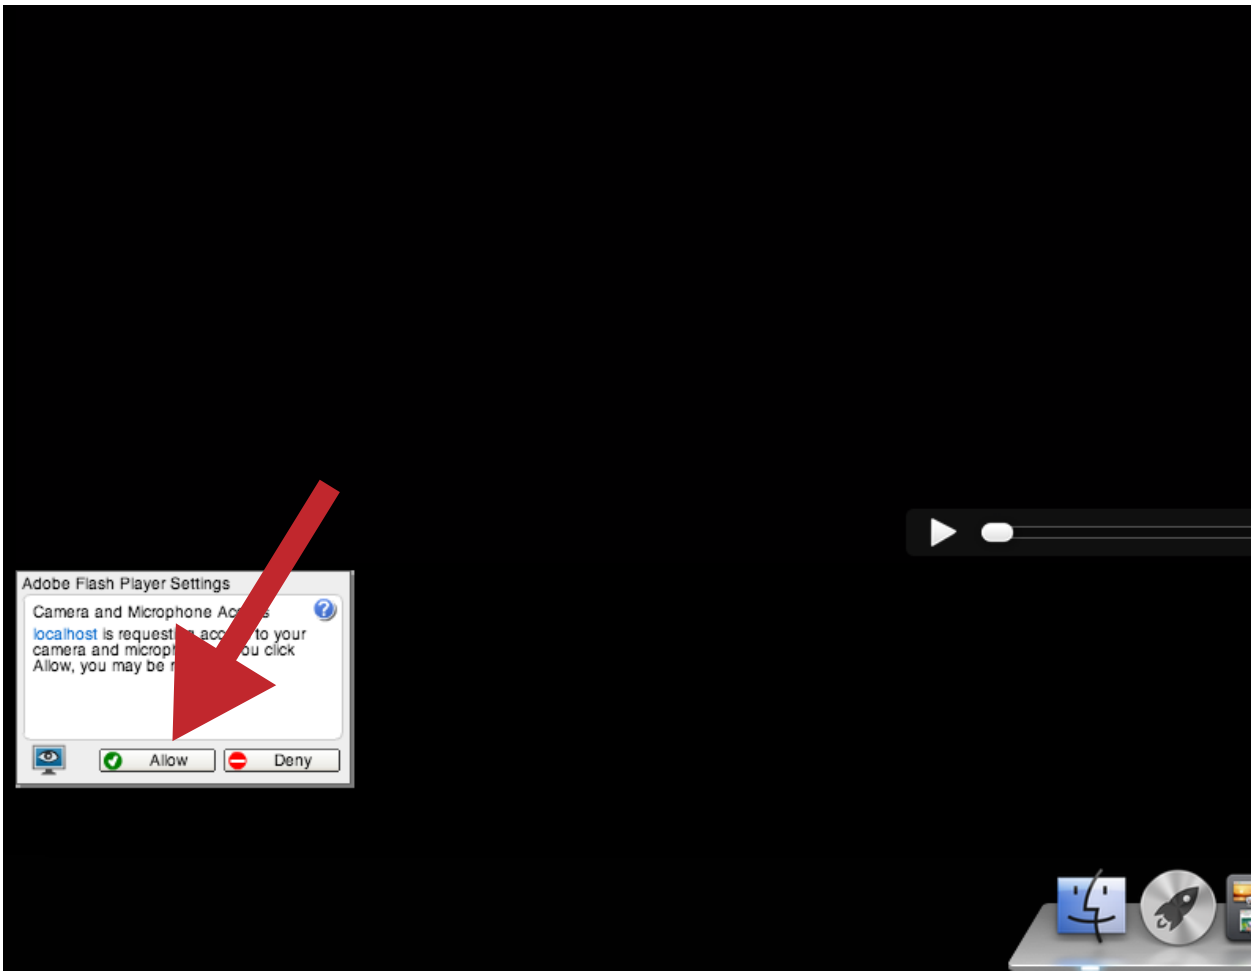
**Step 1: Double click on the "north-channel" folder on the desktop. It's red.**

**Step 2: Double click on the “RUN-ME.sh” file. It’s red, too.**

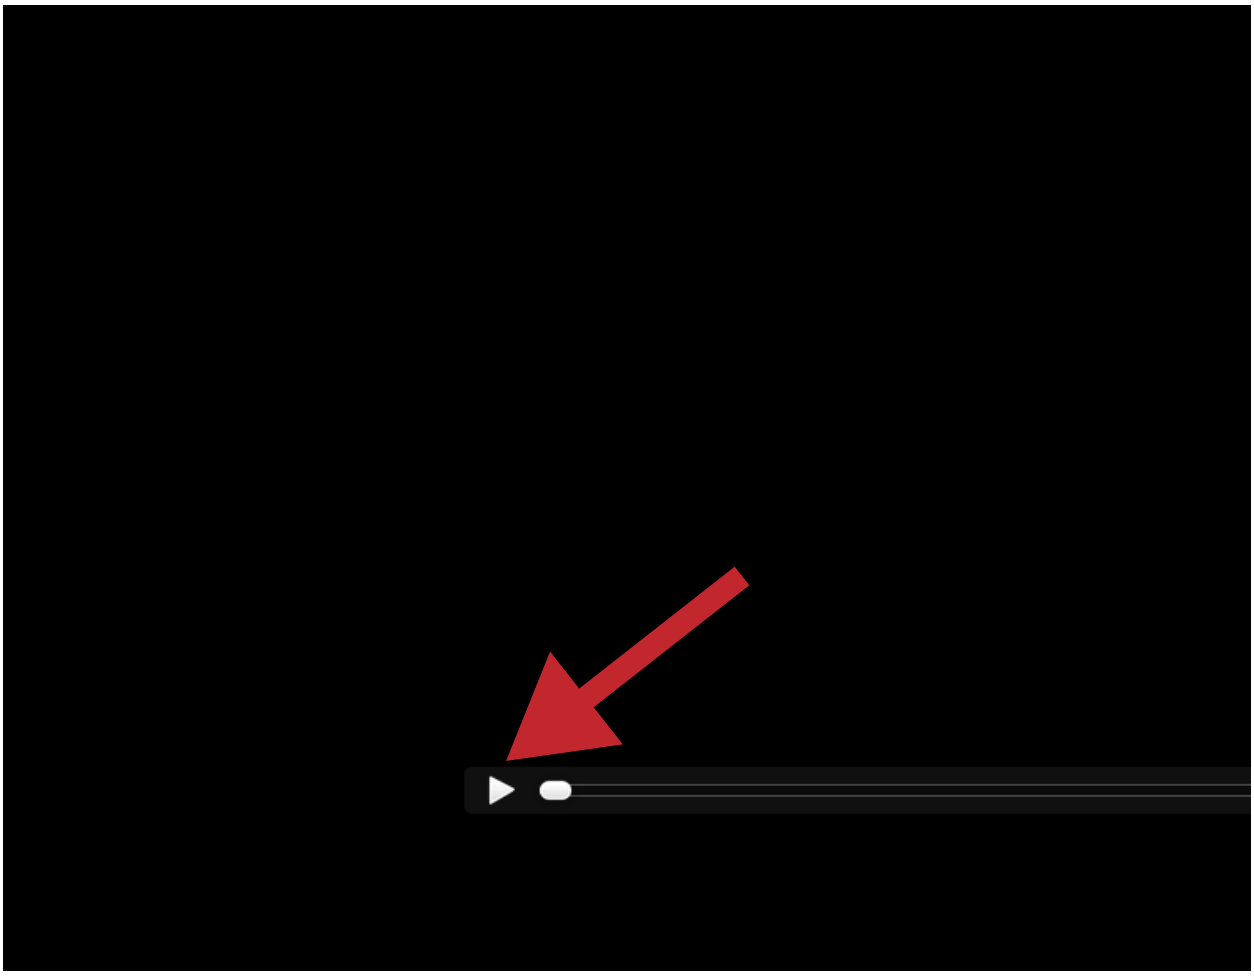




**Step 3: Click on the “Accept” button near the bottom left of the screen.**



**Step 4: Press the play button on the video.**



**Step 5: Press the full screen button on the video.**

**Step 6: Hide the mouse cursor in the bottom left corner. Make sure the Dock or the control bar doesn't show.**

**Step 7: Unplug the keyboard, and hide the mouse and keyboard in the plinth behind the computer.**
